

# Microfit

**MICROFIT** is a one piece MIM bracket. Microfit is the choice of those who insist on quality for a reasonable price. MIM process gives the bracket strength and reliability; slot milling process ensures quality and precision of the slot for the premium control of tooth movement. Moreover, the low profile design, integrated ball hook and anatomical binding base, make this product a perfect mix of comfort, performance and ergonomics.

## Features:

- ✓ Torque in base;
- ✓ Correct In/Out;
- ✓ Rounded corners for patient comfort;
- ✓ Permanent and color coding identification system;
- ✓ Cental Scribe line for easy, accurate placement prevents misalignment;
- ✓ Absolute square slot for a assured torque control;
- ✓ Perfectly smooth slot surface minimizes friction;
- ✓ Integrated ball hook.

- ① Permanent identification coding system
- ② Integrated ball hook
- ③ Milled slot

- ④ Central Scribe-line
- ⑤ Anatomical base shape
