

SUPERTECH

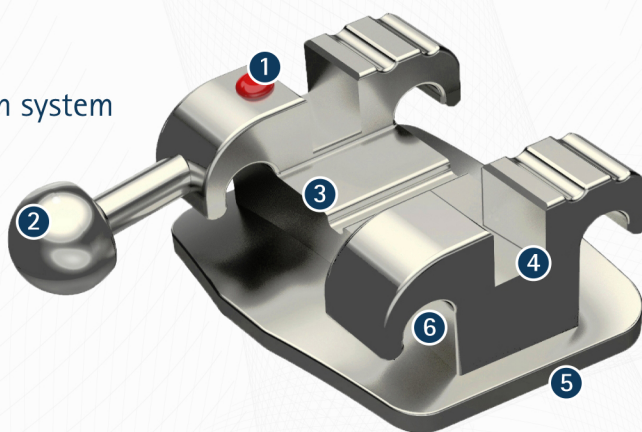

SUPERTECH is the bracket choice of doctors who value quality and precision products for their practices. The **SUPERTECH** manufacturing process combines two different technologies:

- ✓ MIM assures strength and superior finishing of the bracket body;
- ✓ CNC milling process creates a precision slot for accurate control of tooth movement.

Features:

- ✓ Torque in base;
- ✓ Correct In/Out;
- ✓ Rounded corners for patient comfort;
- ✓ Permanent and color coding identification system for each quadrant;
- ✓ Central scribe line for easy, accurate placement prevents misalignment;
- ✓ Absolutely squared slot for assured torque control;
- ✓ CNC milling process ensures smooth slot surface for reduced friction;
- ✓ 80 gauge mesh retentive base facilitates superior bonding;
- ✓ Integrated ball hook;
- ✓ Generous retentive tie wings allow a full engagement of ligatures even when multiple systems are used concurrently;
- ✓ Wide M/D measures for a better tip control.

- ① Permanent identification system
- ② Integrated ball Hook
- ③ Central scribe line

- ④ Milled slot
- ⑤ 80 Gauge mesh base
- ⑥ Generous retentive tie wings
